

# Kevin McKidd: FAMILY & FAVORITES

by duchovlet

HARDER SCRAMBLE: For phrases, letters have been mixed between ALL WORDS in the specific phrase. Groups of letters help indicate the overall number of words in the phrase ... HOWEVER the number of letters in a specific grouping does NOT necessarily indicate the specific number of letters in each word of the phrase.

For example, in a phrase such as "This Word Scramble", all the letters in "This" + "Word" + "Scramble" have been mixed TOGETHER between the 3 words. The letters may be grouped as: "IB CBW TSDROHSLERA" on the puzzle. This indicates there are 3 words in the phrase but DOES NOT tell you that there are 4 letters in the first word ("THIS"), 4 letters in the second word ("WORD"), and 8 letters in the last word ("SCRAMBLE").

This type of word scramble can be very difficult!
